Fracture Mechanics for Concrete and Concrete Structures CALL FOR ABSTRACTS

Conference Chairmen: Bernhard PICHLER, Christian HELLMICH, Philipp PREINSTORFER

Organizing Institutions:

FraMCoS XII Conference

April 22-25, 2025 | Vienna, Austria

The FraMCoS XII conference will be held on April 22-25, 2025 at the TU Wien (Vienna University of Technology) in Austria.

Continuing the remarkable series of FraMCoS conferences that have brought together the key players in the fascinating field of fracture mechanics of concrete and concrete structures, FraMCoS XII will be especially **dedicated to the legacy of Professor Kaspar Willam**, who passed away on January 7, 2024.

We are very pleased that numerous distinguished colleagues have volunteered to organize [mini-symposia](#) on selected topics.

Prospective authors are requested to submit their plain text abstract (maximum 300 words) related to the mini-symposia or thematic tracks by October 4, 2024, via the [online submission system](#) on the conference website.

Please note that only one presentation is accepted per registered participant and that the submission of a full paper (4-12 pages) by December 13, 2024 is mandatory for being included in the conference programme.

We are genuinely looking forward to welcoming you in Vienna, to learn and share exciting new scientific insights and results, to network, and to socialize.
